Education

KL University — Vijayawada, Andhra Pradesh
Bachelor of Technology in Computer Science (Cloud Native Engineering & DevOps) — *July 2024 - Expected July 2028*

Experience

MERN Stack Developer Intern — Aug 2026 – Oct 2026
Main Crafts Technology — *Remote*

- Developed backend functionality for a **To-Do application** using Node.js, Express.js, and MongoDB.
- Configured and managed a **MongoDB Atlas cluster** for reliable cloud-based database storage and application data management.

Cloud & DevOps Intern — May 2026 – July 2026
Sumerix Global — *Remote*

- Deployed a portfolio on AWS using **EC2, S3, and CloudFront** for scalable hosting and delivery.
- Configured **CloudFront CDN** and S3 for efficient static asset delivery and global distribution.

Open Source Contributor — June 2025 – Aug 2026
Social Summer of Code & Open Source Connect India — *Remote*

- Contributed to 12+ open-source repositories by implementing React features, debugging issues, and adapting to unfamiliar codebases.
- Merged 30+ pull requests through Git workflows and peer code reviews, incorporating feedback and collaborating with contributors across projects.

Projects

SNIP — URL Shortener | *Java, Spring Boot, MySQL, Prometheus, Grafana* — GitHub | Live Demo

- Developed a **RESTful URL shortening service** with unique short-code generation, URL redirection, and persistent click tracking using Spring Boot and MySQL.
- Integrated **Prometheus and Grafana** for application metrics collection, monitoring, and dashboard visualization.

EcoGrid — Sustainable Energy Monitoring & Optimization Platform | *Python, Pandas, MySQL* — GitHub

- Developing Python analytics for **energy trends, moving averages, peaks, baselines, and facility comparisons** using Pandas.
- Implemented **Z-score and Isolation Forest anomaly detection** to identify unusual energy-consumption patterns.

Synapse — RAG-Based AI Assistant | *Python, LangChain, OpenAI API* — GitHub

- Built a **document-based RAG assistant** using document chunking, embeddings, and semantic retrieval.
- Debugged and validated the retrieval pipeline to improve **context relevance and response reliability**.
- Containerized the application using **Docker Compose** to simplify local setup and service orchestration.

Technical Skills

Languages: Java, JavaScript, Python, C, SQL
Frontend: React.js, HTML5, CSS3, Tailwind CSS
Backend: Node.js, Express.js, Spring Boot, REST APIs
Databases: MySQL, MongoDB
Cloud & DevOps: AWS (EC2, S3, CloudFront), Oracle Cloud Infrastructure, Docker, Docker Compose, GitHub Actions, Kubernetes
Core CS: Object-Oriented Programming (OOP), Data Structures & Algorithms, Debugging, Code Review
Developer Tools: Linux (Shell Commands), Git, GitHub, VS Code, Eclipse
Problem Solving: 160+ LeetCode Problems, 340+ CodeChef Problems (Java)

Certifications

- Fundamentals of Sustainability and Technology(IBM) — Nov 2024
- Oracle Cloud Infrastructure 2025 Certified Foundations Associate — Jan 2026
- Claude Code in Action by Anthropic
- Agentic AI Day Hackathon — Sep 2025
