EDUCATION

KL University

Bachelor of Technology in Computer Science (Cloud Native Engineering & DevOps)

Vijayawada, Andhra Pradesh

July 2024 - July 2028

EXPERIENCE

MERN Stack Developer Intern

Aug 2026 – Present

Main Crafts Technology

Remote

- Developed backend functionality for a **To-Do application** using Node.js, Express.js, and MongoDB.
- Configured and managed a **MongoDB Atlas cluster** for cloud-based database storage and application data management.
- Implemented **CRUD operations and RESTful APIs** for creating, retrieving, updating, and deleting task data.

Cloud & DevOps Intern

May 2026 – July 2026

Sumerix Global

Remote

- Deployed a portfolio on AWS using **EC2, S3, and CloudFront** for scalable hosting and delivery.
- Configured **CloudFront CDN** and S3 for efficient static asset delivery and global distribution.
- Applied S3 bucket policies and access controls to secure hosted website assets.

Open Source Contributor

June 2025 – Present

Social Summer of Code & Open Source Connect India

KL University, Vijayawada

- Contributed to **12+ open-source repositories**, building React features and resolving bugs.
- Merged **30+ pull requests** through Git workflows, code reviews, and collaborative development.

PROJECTS

Synapse - RAG-Based AI Assistant | Python, LangChain, FAISS, OpenAI API

GitHub

- Built a **RAG assistant** for document-based question answering.
- Implemented document chunking, vector embeddings, and semantic search using FAISS.
- Integrated LLM for context-aware response generation from custom knowledge bases.

FlexyWork - Cooperative Gig Services Platform | React, TypeScript, Express.js, MongoDB, Razorpay

GitHub

- Built a full-stack gig platform connecting workers and service seekers through gig discovery, applications, and shift management.
- Developed role-specific dashboards and workflows for **2 user roles**, supporting worker availability, profiles, and attendance tracking.
- Implemented intelligent gig matching using **skills, experience, ratings, availability, and budget** to improve worker-gig recommendations.

User Authentication System | Java, Spring Boot, Maven, JWT, BCrypt, MySQL

GitHub

- Developed RESTful authentication APIs for user registration and login using Spring Boot and Maven.

TECHNICAL SKILLS

Languages: Java, Python, C, SQL

Frontend: React.js, HTML5, CSS3, TailwindCSS

Backend: Node.js, Express.js

Cloud & DevOps: AWS (EC2, S3, CloudFront), Oracle Cloud Infrastructure, Docker, GitHub Actions

Software Development: OOPs, REST APIs, SDLC, Debugging, Code Review, Version Control

AI/ML: LangChain, FAISS, OpenAI API, OpenCV, MediaPipe

Developer Tools: Git, GitHub, VS Code, Eclipse, PyCharm

Problem Solving: 160+ LeetCode problems, 330+ CodeChef problems (Java)

CERTIFICATIONS

- Google AI/ML Virtual Internship (AICTE EduSkills) — 10 Weeks
- Oracle Cloud Infrastructure 2025 Certified Foundations Associate — Jan 2026
- Claude Code in Action by Anthropic
- Agentic AI Day Hackathon — Sep 2025
